LOCATION

OPTION-1

- Very good location in Mangaon.
- Well designed entrance gate gives good impact of development from distance.
- 6m wide main road dividing the plot is the backbone of the circulation.
- Minimizing the road area gives the maximum utilization of plot for housing.

- Maximum use of FSI.
- Green spaces are designed to give breathing spaces in between.
- Central R.G. & CFC could be main USP for the development.
- Plantation on periphery creates buffer zone for the development.

MAN, as having inherited the genes of creativity ever since their evolution, over the ages, has always tried to express it in some or other form.

Stone Henge is a classic example and the sea shore stacks of stones which we observe and find very interesting to build. This can be reflected in even in various orders & arrangements of the things available around him in his day-to-day routine life, as well as in solid buildings and structures designed by him.

DESIGN MATRIX

About the Firm

On the 10th floor of the Seven East building, the design studio of Seven East Architects is a vibrant space. The studio is a blend of modern and traditional Indian architecture. The space is filled with natural light, and the walls are adorned with intricate Indian patterns. The studio is a place where the firm's design philosophy is put into practice. The firm's design philosophy is to create spaces that are both functional and aesthetically pleasing. The firm's design philosophy is to create spaces that are both functional and aesthetically pleasing.
